

The background of the top half of the image is a photograph of a church interior. It features a large, ornate dome with intricate carvings and a central skylight. The architecture is classical, with arches and decorative moldings. The lighting is warm and golden, highlighting the textures of the stone or plaster.

Our Services

Our fully trained and highly experienced church lighting engineers provide the full spectrum of services including:

Functional Lighting Solutions

We plan and design effective lighting that encompasses the varied visual needs of the congregation and clergy. Our creative and flexible energy efficient lighting designs can be used to accentuate special liturgical celebrations (Christmas, Easter), as well as lending vibrant and theatrical atmospheres for concerts and community events that ecclesiastical buildings are often used for today. Our lighting design schemes adhere to the CIBSE code of lighting.

Architectural and Decorative Lighting Solutions

We use innovative, state of the art energy efficient light technology to enhance the ecclesiastical atmosphere drawing emphasis on architectural features and textures without them being a distraction from liturgy or a source of glare for clergy or congregation.

We understand the importance of conservation and preventing of UV Radiation in preservation of pigment in church paintings and delicate artwork and icons.

Exterior Lighting Solutions

Our exterior lighting provides effective illumination for the church entrances ensuring safety and security for both visitors and the building during evening services and night time.

Our exterior designs enhance and draw focus to any architectural features as well as delineate the church building as a landmark within the community.

Latest Project

St Johns Church in Haywood, Greater Manchester

St Johns church in Haywood, Greater Manchester, gets a new lighting system installed by the nations number 1 lighting specialist, with spectacular results.

The main worship area gets all new down lights to ensure no more dark areas in the nave of the church. By installing new LED lights it allows the church to reduce running and maintenance cost.

The side aisle was a forgotten area until new under arch lighting was installed. Bringing the side areas back into the church gives a warmer and more open feel to the church.

The overall result has been very well received, and the our specialist church lighting engineers have been highly praised on their professionalism and commitment to the job.
